

Panel Lifter Specifications

Features and Benefits

- **20,000 lb lifting capability per Panel Lifter**, multiple units increase lifting capability; for example three units would lift approximately 60,000 lb.
- **Fully certified to work across the rail network**, including under live Overhead Line Equipment (OLE), Any Line Open working (ALO), and Catenary.
- A fully loaded Panel Lifter System **can turn in any direction while in motion**.
- Variable track width allows access and **use in narrow environments** like bridges, tunnels, and narrow right of way.
- Ideal for **removing and installing panels** on main line, repairs, and challenging new builds or crossings
- Can **easily cross multiple tracks** without damaging the rail.
- Can grab **all gauges** of track.
- **Compact size and maneuverability** enables easy transportation, rapid deployment, and demobilization.
- A panel lifter system of two machines can be used to **move panel lengths up to 90ft** long. More machines can be added to move longer panels.
